

MISSONI

FALL WINTER 2023 COLLECTION

The **Missoni Kids Fall Winter '23** collection evokes the fashion house's identifying traits, such as - for example - the classic slub design and the zig-zag, translated with more playful and lively colours.

The colour **palette** boasts refined teal, dark blue and rust for boys, as well as beautiful shades of pastel pink, magenta and burgundy for girls.

One of the new themes to feature in the collection is **mohair wool**, used with different colours that create two striking hues - one more suitable for boys and one more so for girls.

There is no shortage of **embroideries**, personalised labels and fabrics embellished with **sequins** for the brand's occasion wear.

Just as there are also more comfortable and everyday fabrics, such as cotton jersey, fleece and a soft jacquard teddy.

Numerous **accessories** are available to complete the looks, including hats, scarves and bags.

The **new born** collection expands its proposal, also making room for petite cute and practical elements, such as the bottle holder and large spacious bag to accommodate everything a newborn needs.
